

Placing an order on UC Stratocore as CCHMC or external users

1. Once your account has been approved, log in to Stratocore using your account information and press “Order” at the top of the screen. From there, you may enter the services you are requesting for your samples.

You may create a project for your order – however, this is for **your record only**. Creating a project is not placing an order. You may have multiple orders within a project but should only have one order per group of samples.

Select the Lab service you would like us to provide and enter the quantity (number of samples). We will add the Pass-through (reagents, consumables, etc.) later to finalize the **total price**, which will match the one we provided to you.

Press “**Save quote**” (not **Order**) once you have entered all of the information.

If you have a PO number for this order, please enter it here:

Order **Save quote**

2. A PO number is **required** for invoicing. Therefore, after you save the quote (**do not press the Order button**) we will update the services to finalize the **total price** including the pass-through. Then we will email you with the **total price** for you to submit to your purchasing office for a PO number.

3. Please email us the PO number as well as a sample information file (please fill out the excel file titled **Manifest file template** which can be downloaded at <https://med.uc.edu/depart/eh/cores/genomics/services-and-order>).

4. We will update your quote with the PO number and create an order from it. After this is completed, please bring your samples to the Core.
